

## Car Rentals

There are national and local car rental companies available at, or near, the airports. All of the companies need to pick you up in a shuttle to take you to their lot. On-airport companies have an airport surcharge, off-airport companies are usually a bit cheaper. Make sure to bring a copy of your insurance information “declarations page” (company name, phone and policy number and the fact that you are covered for accidents in rental cars in Puerto Rico), and your driver’s license (no special driver’s license is needed here for tourists).

There are a number of toll roads in Puerto Rico, with each toll being between \$0.75 and \$3. We use an electronic toll pass called *AutoExpreso*, which is much like *EZPass* in the north-eastern US. The car rental places will rent you an *AutoExpreso* tag with the car. It lets you zip through the tolls instead of waiting in the cash lane. You really will need to have a tag because some of the toll roads no longer have a cash lane and the Mobilcard lanes will read the pass on the car’s window.
