

Bio-sketch Template for ESA Fellows Nominee

(Three Pages Maximum)

Summary

A 250 word bio for the nominee. The bio should highlight the major contributions made by the nominee that spurred the nomination.

Rationale

Nominators should identify and justify the focus area of the nomination. Toward this goal, it is recommended to list 3-5 major impacts achieved by the nominee.

Major Impacts

1. Describe the issue or problem you were addressing
 - a) What was your role in the work?
 - b) What was the impact of the work?
2. Describe the issue or problem you were addressing
 - a) What was your role in the work?
 - b) What was the impact of the work?
3. Describe the issue or problem you were addressing
 - a) What was your role in the work?
 - b) What was the impact of the work?

Mentorship

What is your mentorship philosophy and how has it been informed and changed over your career? Who have you brought into science or science-thinking with you? How have you developed the skills or careers of others? How do they demonstrate that they have held onto your mentoring? Where are they working now and what are their major achievements?

As ESA has a commitment to develop all members, the expected outcome is that mentees will be of diverse perspectives and backgrounds and can describe how they have been positively impacted as a result of the interactions with the nominee. The expectation of widely documented expertise and status as an opinion leader is essential regarding advisory roles.

Service

In terms of service to the discipline of entomology (not just ESA), where do you devote your time and skills? Where have you had the most impact on our discipline?

Awards and Recognition

Are others recognizing the impact of your work? Which awards have meant the most to you?
